considering. Some of the leading characteristics of the Lynngams will now be detailed. The Lynngams are by complexion swarthy, with features of Mongolian type. The men are of middle height and the women remarkably short, both sexes being not nearly so robust as the Khasis, a result due probably to climatic influences, for the Lynngams live in fever-haunted jungles. The men have very little hair about the face, although a scanty moustache is sometimes seen, the hairs in the centre being carefully plucked out, the result being two tufts on either side. Beards are never seen. The women are ill-favoured, and wear very little clothing. The men wear the sleeveless coat of the Khasi and Mikir pattern, called *phong-marong*, which is made of cotton dyed red, blue, and white. This custom may have been borrowed from the Khasis. They do not grow their own cotton, but obtain it from the plains. They make their own dyes, *changlong* (red) and *hur sai-iong* (black). A cotton cloth, barely enough for purposes of decency, is tied between the legs, the ends being allowed to hang down in front and behind. Sometimes an apron is worn in front. At the present day the men wear knitted woollen caps, generally black or red, of the Nongstoin pattern (a sort of fisherman's cap), but the elderly men and head-men wear turbans. The females wear a cotton cloth about eighteen inches broad round the loins, sometimes striped red and blue, but more often only dark blue. A blue or red cloth is thrown loosely across the shoulders by unmarried girls, but married women only wear the waist-cloth, like the Garos. A cloth is tied round the head by married women, sometimes, Garo fashion. The women wear quantities of blue beads as necklaces, like their Garo sisters. They obtain the beads from the Garo markets at the foot of the hills. Brass ear-rings are worn by both sexes; the women, like the Garos, load their ears to such an extent with brass rings as to distend the lobes greatly. Silver armlets are worn by the head-men only, or by those who possess the means to give a great feast to the villagers. This is the custom of the Garo *nokmas*, or head-men. Both sexes wear bracelets. The men also wear necklaces of beads. The rich wear necklaces of cornelian and another stone which is thought by the Lynngams to be valuable. A necklace of such stones is called *u'piong blei* (god's necklace).

(9) Cotton is grown on high lands and
248 slopes; it is sown in April, and becomes fit for picking by January.

311 Area and Out-turn of Crops.—According to the Assam Ad-
241 ministration Report for 1875-76, the area of the British portion of
648 the Khási and Jáintiá Hills District amounts to 2160 square miles, of which only 110 are under cultivation; of the remainder, 1337 square miles are set down as cultivable, and 713 as uncultivable. The total area of the semi-independent Khási States is given as 3997 square miles, of which 176 are under cultivation, 2561 are cultivable, and 1260 uncultivable. In another portion of the same Report, the area under various crops throughout the entire District is thus approximately estimated:—Rice, 59,880 acres; other food grains, 57,820 acres; cotton, 1076 acres; potatoes, 33,880 acres. The average out-turn of rice per acre is returned at 8 *maunds*, or nearly 6 cwt.; of other food grains, 3 *maunds*, or over 2 cwt.; of cotton, 1 *maund*, or 1¼ cwt.; of potatoes, 55 *maunds*, or nearly 40 cwt. The price of rice in 1875-76 was Rs. 4. 8 per *maund*, or 12s. 8d. a cwt., which gives Rs. 36 or £2. 12s. as the value of the rice crop obtained from one acre.

[435]

241 Condition of the Peasantry.—The Khásás can scarcely be
423 considered an agricultural people, as they do not grow sufficient
433 grain for their own subsistence, and are dependent to a great extent on imports of rice from the neighbouring Districts. Ten acres is generally considered a comfortable holding for a husbandman in the position of an ordinary Bengal peasant, but scarcely any man in the Hills depends entirely upon the produce of his land for his support. In the Jáintiá Hills a cultivator's position is considered to be very low if he possesses no cattle, but performs all the operations of agriculture with his own hands. In that portion of the District, five acres is all that can be cultivated with a single pair of oxen, the average being four acres. A husbandman with a holding of five acres would not be so well off as a retail shopkeeper, nor would it enable him to live as comfortably as he could on a money wage of Rs. 8 or 16s. a month. The peasantry, however, as a class are not in debt. The land is owned chiefly by small proprietors, who occupy and cultivate their hereditary fields. The relations of landlord and tenant do not exist in the Hills, and no rent is payable to any one; consequently the principle of Act x. of 1859 (the Rent Law of Bengal) has no application.
